harvest as
needed
anytime during
the week**

Whatever your schedule may be this summer, there is an opportunity for you! Some of the volunteer opportunities must be performed on a specific day and others may be performed any day of the week. There is something for everyone! You may sign up for one or more activities each week, a different activity each week, or just volunteer whenever you have the time. Some of the activities are great for teaching children about the wonder of gardens. Others are ideal for sharing time with one or more special friends. A few of the activities are perfect for those of you with busy schedules who just want to get out and enjoy the beauty of nature. Don't worry if you don't know what to do; we have folks that can provide you with detailed instructions for any opportunity you may choose.
